SUMMARY

Recent Master's graduate in Applied Data Science & Analytics with a Bachelor's in Computer Science & Engineering and three years of enterprise experience at Infosys. Hands-on expertise in Python, SQL, Statistics concepts, Machine Learning algorithms, prompt engineering, and data pipelines, demonstrated through high-impact projects like NLP based medical note automation(saving physicians 60–70% of documentation time), Michigan traffic volume forecasting with time-series models, pedestrian detection using camera and lidar inputs, and building a material science research support tool (reduced manual lookup and comparison time by 80%). Strong communicator and leader with demonstrated experience in leading knowledge transfers, driving cross-functional teamwork, and coordinating research initiatives. Actively seeking Junior Data Scientist opportunities starting February 2026. Prepared to deliver measurable impact.

SKILLS

Languages: Python, SQL, R, Bash, C#, Java

Libraries: Pandas, NumPy, SciPy, Scikit-Learn, TensorFlow, PyTorch, Keras, Matplotlib, Seaborn

Tools: Excel, Power BI, Tableau, Hadoop, Databricks, Monday.com, ServiceNow, Matlab

ML Algorithms: Linear & Logistic Regression, K-NN, Random Forest, XGBoost, SVM, MLP, CNN, LSTM, PCA, K-Means Clustering

EDUCATION

MASTERS IN APPLIED DATA SCIENCE AND DATA ANALYTICS

Apr 2024 – Dec 2025

- Kettering University, Flint, MI | GPA: 3.81
- Relevant Coursework: Artificial Intelligence | Machine Learning | Data Mining | Data Analysis and Visualization |
- Statistics for Data Science | Communicating Data | Project Management | Autonomous Driving Systems

BACHELORS IN COMPUTER SCIENCE AND ENGINEERING

July 2016 – Oct 2020

- APJ Abdul Kalam Technological University, Kerala, India | GPA: 3.2
- Relevant Coursework: Computer Vision | Machine Learning | Deep Learning | Data Warehousing

EXPERIENCE

GRADUATE RESEARCH INTERN (DATA ANALYTICS) –Kettering University, Flint, MI

Apr 2024 – Present

- Led Data Acquisition and Analysis for an NSF granted materials science research project.
- Developed an interactive Python research tool and data pipeline to collect, standardize, query, analyze, compare, (ETL) and visualize data from six different websites using REST APIs.
- Improved research efficiency by 80%, by automating material lookups and comparison.

SENIOR SYSTEMS ENGINEER –Infosys, Kerala, India

Jan 2021 – Jan 2024

- Led several User Acceptance Testing for inhouse tools, Knowledge transfers, troubleshooting with non-technical stakeholders.
- Risk management in production environments, testing & validation before rollout. Collaboration with cross-functional teams.
- Authored internal documentation and guides to support workflows improving efficiency by 70%.

PROJECTS (Additional projects available on GitHub)

GenAI-BASED MEDICAL NOTE GENERATION USING GPT FINE-TUNING AND PROMPTING

Python, GPT-3.5 Turbo (Open AI API), JSONL, Prompt Engineering, Pandas, NumPy

- Built an end-to-end NLP pipeline using GPT-3.5 Turbo to convert doctor-patient conversations into structured medical notes, reducing physician documentation time by ~60–70% per patient.
- Managed and prepared training datasets in JSONL format, applying prompt engineering, text preprocessing, and structured output formatting for high-quality clinical documentation.

TRAFFIC VOLUME PREDICTION

Time series data, Linear regression, Neural Network, XGBoost, LSTM

- Compared multiple forecasting models on Michigan traffic data to predict hourly/daily volume with improved accuracy over baseline methods.
- Applied EDA, feature engineering with lags, rolling statistics, cyclic encoding (sin-cos transformations), categorical encoding, denoising and MinMaxScaler to capture seasonal trends and improve model performance.
- Evaluated model performance using MAE, RMSE, and R^2 metrics.

PEDESTRIAN DETECTION USING CAMERA-LIDAR SENSOR

Python, Yolo v5, MMDet3D-PointPillar

- Developed a system that detects pedestrians from camera and lidar sensor inputs separately.

PROFESSIONAL HIGHLIGHTS

- Microsoft Certified: Azure Fundamentals (AZ-900), Microsoft Certified: Power Platform Fundamentals (PL-900)
- Volunteered: Bless Flint community support Event (2024 and 2025), Kingdom Encounter Crusade- Caseville Cheeseburger Festival
- Awards (from Infosys, nominated by mentors and colleagues): Rising Star Award, Team Collaborator Award, Guiding Light Award
